

**TEST SUITE for SAP® solutions**

# TEST SUITE for SAP® solutions

The suxxesso TEST SUITE for SAP® solutions offers a new approach to test automation via providing defined and automated test cases for the SAP® standard modules FI, CO, MM, SD and PP. This allows you to start testing after a set up period of only a few days.

The included test cases provide up to 80% test coverage and decrease the development costs by up to 93% as well as the maintenance costs by up to 77% compared to a conventional test automation project.

### Expertise

suxxesso TEST SUITE for SAP® solutions is based on extensive SAP® knowledge. Test cases were defined by leading SAP® experts with vast intersectoral experience. This guarantees high test coverage for your business processes.

### Test Case Description

Each test case contains a detailed description covering textual and model based (BPMN 2.0) illustrations. You benefit from test case descriptions of highest quality.

### Automated Test Cases

All test cases within the suxxesso TEST SUITE for SAP® solutions are fully automated using state of the art automation technologies - continuous extension of test coverage and maintenance are included. The test case repository provides a comprehensive utility library to easily expand and reuse test cases for further testing of standard or individual processes.

### Verification of test results

Reliable and exact verification is vital for high-end test automation. Detailed reports help to analyse test results and to take further actions for improvements.

The suxxesso TEST SUITE for SAP® solutions contains a Ranorex Studio Premium Floating License. This enables the automation of numerous non-SAP® technologies.

## Your Benefits

**4 Days**  
set up period

**80%**  
test coverage

**-93%**  
costs for test automation

**-77%**  
maintenance costs
